P R E F A C E

This bibliography includes references to books, periodicals, bulletins and articles in the farm papers on 4-H club work issued prior to 1931. In the compilation of the extension publications of the State agricultural colleges, many of which have been revised, only the latest revision has been included. Numerous references to articles in the farm papers were examined, but only the more important ones are cited.

In consulting this bibliography the users are reminded that many of the subject-matter publications give directions that are no longer considered the best. However, the early publications have been included in order to help those who are making a study of the development and progress of club work.

Many publications herein listed are no longer available for free distribution but may be consulted in the United States Department of Agriculture Library and the libraries of the State agricultural colleges.

Cora L. Feldkamp,

January 12, 1932.

Librarian, Office of Experiment Stations.

Acknowledgment is due Mildred A. Wilson, now in the Bureau of Public Roads Library, for assistance in the early stages of this bibliography.

Pure-bred Holstein calf clubs in the Linwood community, Leavenworth county, Kansas, have resulted in the establishment of nearly a score of pure-bred herds and indirectly in almost as many more. Calf clubs gained the interest of the fathers and have led to the development of a dairying community where there were very few pure-bred animals before the organization of the calf clubs.
